**PROFESSIONAL EXPERIENCE:**

Mr. Jacobson is currently senior Vice-President for Jacobson Companies. He has served as Town Engineer for the Town of Parker and County Engineer for La Paz County. Mr. Jacobson has been involved in civil engineering and development projects in Arizona since 1963. As engineer his experience includes design of water and sewer treatment plants, pumping and distribution systems, roads and streets, interstate highway systems and flood control structures survey and design for both the private and public sector for the past 48 years.

Mr. Jacobson was also involved in the design of the Foothills Boulevard Traffic Interchange, which required initial studies, drainage analysis and reports, traffic analysis and interchange design, earthwork analysis and right-of-way acquisition working in collaboration with the Arizona Department of Transportation. His experience also includes field inspections for banks and lending institutions.

Recent projects concerning flood control studies includes the Foothills Storm Drain Plan Study, which involves basic field control, aerial mapping, hydrology analysis as well as construction cost and reports.
